

30 September 1997

(CALS)

MEMORANDUM FOR DISTRIBUTION

SUBJECT: Disposition of Comments for MIL-STD-2549

In accordance with DoDD 4120.-3M the disposition of your comments are documented in the attached. All comments were reviewed by the Configuration Management Advisory Group to ensure all service and government agency viewpoints were considered.

We thank you for your comments and appreciate your interest in the standard. The document was approved on June 30, 1997 and the link can be found on the internet address [www.acq.osd.mil/cals](http://www.acq.osd.mil/cals).

COMMENTS ON MIL-STD-XXX  
CONFIGURATION MANAGEMENT DATA INTERFACE STANDARD  
15 September 1995

(ONLY ONE COMMENT PER FORMAT)

COMMENT NUMBER: 1           # ESSENTIAL       SUGGESTED       EDITORIAL

(CHECK ONLY ONE)

SUBMITTED BY:

NAME:                   Ms Lee Sadauskas

ADDRESS:                Commander, US Army Armament Research,  
Development and Engineering Center (ARDEC)  
ATTN: AMSTA-AR-EDE-S, Bldg 12 (Lee Sadauskas)  
Picatinny Arsenal, NJ 07806-5000

TELEPHONE NO:         DSN: 880-6626

PAGE NO: General       PARAGRAPH NO: 3       FIGURE NO:       TABLE NO:

PROPOSED CHANGE:   (Exact wording of proposed change must be included)

The requirement for delivery of a complete CM data file must be addressed.

JUSTIFICATION:   (Required for essential comments)

In order for the government to transfer the data developed and maintained by the contractor, for each end item/weapon sytem, the description of the government file formats must be specified in this standard. The data is essential for supporting spare parts procurement, addressing (indexing ) the JEDMICS data base, allowing seamless access of configuration documentation and for tracking configurations of fielded systems.

\_\_\_\_ ACCEPTED

\_\_\_\_ ACCEPTED W/MODIFICATION (Shown below)

\_\_\_\_ DOWNGRADED TO SUGGESTED AND ACCEPTED

X REJECTED

1) After production but before delivery, this would be a waiver, but, the RFD has  
replaced the waiver so that we do not have to differentiate between work done, work  
in process, and work to be done.

2) After production & delivery, this is a modification. Is this change proposing  
that an RFD be used as a modification request?

3) Recurring deviations are covered in table 359.

CONFIGURATION MANAGEMENT DATA INTERFACE STANDARD  
15 September 1995

(ONLY ONE COMMENT PER FORMAT)

COMMENT NUMBER: 3            # ESSENTIAL        SUGGESTED        EDITORIAL

(CHECK ONLY ONE)

SUBMITTED BY:

NAME:                        Ms Lee Sadauskas

ADDRESS:                    Commander, US Army Armament Research,  
Development and Engineering Center (ARDEC)  
ATTN: AMSTA-AR-EDE-S, Bldg 12 (Lee Sadauskas)  
Picatinny Arsenal, NJ 07806-5000

TELEPHONE NO:               DSN: 880-6626

PAGE NO: General        PARAGRAPH NO: 3        FIGURE NO:        TABLE NO:

PROPOSED CHANGE: (Exact wording of proposed change must be included)

General comment: Before this standard is released for publication, a thorough review needs to be conducted to ensure that all acronyms have been identified and listed in paragraph 3.1; that the acronyms have been correctly capitalized (for example, MIL instead of Mil ); and that any referenced documents are current (listed in the DODISS ). Recommend all acronyms and definitions of this draft be consolidated in a separate appendix. By moving to a separate appendix or Glossary, it would eliminate 112 paragraphs from the Table of Contents and Section 3. It would also eliminate additional definitions in most of the current appendices.

JUSTIFICATION: (Required for essential comments)

Not all acronyms are correctedly listed, not all acronyms are listed in paragraph 3.1, Several references are made to military standards that have been cancelled.

PAGE NO: E-1                      PARAGRAPH NO:                      FIGURE NO:                      TABLE NO:

PROPOSED CHANGE: (Exact wording of proposed change must be included)

Delete the Problem Change Report. This entails deleting Appendix E and any associated DED's, etc. from the standard.

JUSTIFICATION: (Required for essential comments)

The purpose of the interface standard is to identify the standard data that needs to flow across the interface between a contractor and DOD to adequately support DOD materiel. The PCR is intended to report problems that are being experienced by users of programs that access the interface. While this is a prudent and wise thing to implement on the part of the particular system's administrator, it is not appropriate for this standard.

PROPOSED CHANGE: (Exact wording of proposed change must be included)

Task 112 uses the phrase "commercial-off-the-shelf (COTS)". Recommend the definition of COTS be included in the definition section of this Appendix. The proposed official definitions were in a draft NDI handbook, dated June 1995, and published by the Office of the Assistant Secretary of Defense for Economic Security. Recommend the committee contact the above office for the final approved definition of these terms for inclusion in this Appendix.

JUSTIFICATION: (Required for essential comments)

COTS does differ from NDI in official definition and since NDI is in Section 3 recommend the definition of COTS be added also.

X REJECTED

- 1) Concatenation of these fields allows use of the resulting string in the same manner as a part number.
- 2) If not concatenated, then document type must be carried as a key field in all lower tables.
- 3) And, the use of a "generic material" which could be either project unique, military-spec, industry organization spec or commercial would not be possible. This would require over 100 more tables to deal with this one special case, especially in hte PL as configured areas.

PROPOSED CHANGE: (Exact wording of proposed change must be included)

This paragraph uses the phrase "throw away item". Recommend this term be defined in the definitions section.

JUSTIFICATION: (Required for essential comments)

The phrase "throw away" is not in the current definitions section. The proposed definition should be applicable to both weapons systems and information systems.

PAGE NO: C-015        PARAGRAPH NO: C.5        FIGURE NO:        TABLE NO:

PROPOSED CHANGE: (Exact wording of proposed change must be included)

The field size of the codes should be checked for consistency and presense throughout Appendix C. Most of the DEDs list a field size but some do not. There appears to be no rational for why the field size is omitted and this leads to confusion. Some of the field sizes seem to be incorrect. For example those for: 0002 international-enterprize-identification-code 0002 primary-enterprize-identificaion-code 0002 united-states-non-government-enterprize-identification-code

JUSTIFICATION: (Required for essential comments)

Consistancy and ease of understanding.

-----  
RESOLUTION OF ESSENTIAL COMMENT:

( Check below box with X )

TELEPHONE NO:              DSN: 880-6626

PAGE NO: C-023        PARAGRAPH NO: C.5        FIGURE NO:        TABLE NO:

PROPOSED CHANGE: (Exact wording of proposed change must be included)

Delete the exception of the list of letters (usually I, O, Q, S, X and Z ) from the definitions that are document-identifiers (0003 ) and revision-identifiers (0009 ). Usual wording is "Uppercase letters (except I, O, Q, S, X and Z ), numbers ..." Change to "Uppercase letters, numbers ..."

JUSTIFICATION: (Required for essential comments)

Legacy systems have excluded the use of certain letters because in written form they are often confused with numbers that they visually resemble. Mis-interpreting these letters is no longer a problem when communicating among electronic databases and therefore there is no requirement for this exclusion. Continuing to insist upon this business rule will add unnecessary complexity and cost (program development and operational ) to the system.. The Army currently allows the use of some of these characters in current systems which then requires individually modifying these entries. If comment not accepted, then these changes will have to be identified.

                          Development and Engineering Center (ARDEC)  
                          ATTN: AMSTA-AR-EDE-S, Bldg 12 (Lee Sadauskas)  
                          Picatinny Arsenal, NJ 07806-5000

TELEPHONE NO:       DSN: 880-6626

PAGE NO: I-3       PARAGRAPH NO: I.5.1.1c       FIGURE NO:       TABLE NO:

PROPOSED CHANGE: (Exact wording of proposed change must be included)

Third sentence reads: "The letters I, O, Q, S, X and Z shall not be used."  
Delete this sentence.

JUSTIFICATION: (Required for essential comments)

Restricting the use of these letters should no longer be necessary. Restriction was based on the likely hood of human mis-interpretation because of the visual similarities to written numbers. Is related to a similar general comment for appendix C.

-----  
RESOLUTION OF ESSENTIAL COMMENT:

( Check below box with X )

\_\_\_\_ ACCEPTED

X     ACCEPTED W/MODIFICATION (Shown below)

Final Disposition: Concur. Changes due to comments on the detailed requirements contained in Appendix I are relected in Data Information Packet 4, Table DIP4-1, Subpacket 4G, or in the notes and DEDs referenced therein. The reformatting makes it difficult to see exactly how your comment was addressed, but unless marked "rejected" above, the comment was acted upon favorably. All comments received contributed substantially to the reorganization of this Standard to convert it to a true Data Interface Standard, and were greatly appreciated.

\_\_\_\_\_ DOWNGRADED TO SUGGESTED AND ACCEPTED

X       REJECTED

This would violate the tiering prohibition. In addition 1840 & 2549 data delivery are not fully compatible because the scope of the standards are different. Also MIL-STD-184 does not allow for multiple representations of the same document. Appendix A directs users to use 1840 when not getting electronic delivery of meta data.

PAGE NO: General                      PARAGRAPH NO: 3                      FIGURE NO:                      TABLE NO:

PROPOSED CHANGE: (Exact wording of proposed change must be included)

Eliminate any references to a standard DOD CM system.

JUSTIFICATION: (Required for essential comments)

Any automation system that satisfies the business rules spelled out in this standard meets DOD requirements. Having a DOD standard CM system is an implementation issue and a DOD management prerogative. Recent decisions would indicate that DOD is backing away from enforcing standard systems.

PAGE NO: 07       PARAGRAPH NO: 3.       FIGURE NO:       TABLE NO:

PROPOSED CHANGE: (Exact wording of proposed change must be included)

Add New Definition. Configuration Freeze: A record of the approved configuration of a CI at a specific point in time.

JUSTIFICATION: (Required for essential comments)

Configuration Freeze is an automation capability required to establish temporary and permanent baseline records and is essential to meet procurement, legal and safety requirements. The Army DSREDS and the DOD JEDMICS provides the ability to view previous approved documentations and the CM system needs to be able to extract this data.

-----  
RESOLUTION OF ESSENTIAL COMMENT:

( Check below box with X )

\_\_\_\_ ACCEPTED

\_\_\_\_ ACCEPTED W/MODIFICATION (Shown below)

\_\_\_\_ DOWNGRADED TO SUGGESTED AND ACCEPTED

PAGE NO: H-04              PARAGRAPH NO: H.1.3.2              FIGURE NO:              TABLE NO:

PROPOSED CHANGE: (Exact wording of proposed change must be included)

Third line reads: "urgent priority ECP when it is impracticable to document and". Change to read: "urgent priority ECP when it is impractical to document and".

JUSTIFICATION: (Required for essential comments)

-----  
RESOLUTION OF ESSENTIAL COMMENT:  
( Check below box with X )

\_\_\_\_ ACCEPTED

X      ACCEPTED W/MODIFICATION (Shown below)

Final Disposition: The general nature of the comments on Sections 1, 2, 3, 4 and 6 of Appendices F, G, H, I, J, K, and L were such that those Appendices were all deleted and replaced with Data Information Packets in an effort to present the data requirements unambiguously and without imposing hidden tasking requirements in "standard" text sections of the six section format for MIL-STDs. The reformatting makes it difficult to see exactly how your comment was addressed, but unless marked "rejected" above, the comment was acted upon favorably. All comments received contributed substantially to the reorganization of this Standard to convert it to a true Data Interface Standard, and were greatly appreciated.

Picatinny Arsenal, NJ 07806-5000

TELEPHONE NO:               DSN: 880-6626

PAGE NO: General        PARAGRAPH NO: 3        FIGURE NO:        TABLE NO:

PROPOSED CHANGE: (Exact wording of proposed change must be included)

When a definition is taken from a source, it should be taken verbatim. The source should be referenced and the source should be listed in Section 2. Each definition's source should be checked to verify that the definition is the same. For example, many of the definitions given differ from those contained in EIA/IS-649. Common elements between these standards are: Approval; Approved data; Archived data; Computer software documentation; Configuration; Configuration audit; Configuration control; Configuration Documentation; Configuration identification; Configuration management; Configuration status accounting; Contract; Data; Disapproval; Engineering change; Firmware; Fit; Form; Function; Functional Attributes- (same as Functional Characteristics in the Standard ); Hardware; Interchangeable- (same as Interchangeable Item in the standard ); Interface; Interface control; Interface control documentation; Life Cycle; Manufacturer's Code; Nomenclature; Non-conformance; Original; Physical Attributes- (same as Physical Characteristics in the standard ); Release; Released data; Retrofit; Rework; Software; Software unit; Specification; Submitted data; Support equipment; Unit; and Waiver Delete definitions for commonly used terms or terms that are not used in the standard such as: interface; survivability; evaluation; and contractual acceptance. (These common terms should be deleted even if they are defined in EIA/IS-649. ) Delete definitions and acronyms where appropriate of terms that are no longer used, such as waiver; SCN and ACN. Delete definitions that are also defined as DEDs in Appendix C, such as: Serial Number, nomenclature, CAGE Code; Manufacturer's Code; lot number; engineering change priorities; engineering change proposal type; NATO supply code; classification of defects; and document custodian.

JUSTIFICATION: (Required for essential comments)

Clarity and less confusing to the user.

-----  
RESOLUTION OF ESSENTIAL COMMENT:

( Check below box with X )

\_\_\_\_ ACCEPTED

X      ACCEPTED W/MODIFICATION (Shown below)

MOD - Source references for all definitions have been deleted. Common Terms - There are some distinct and intentional differences between definitions used in this document and those defined in other documents. Based on the decision that some terminology requires specific wording in the context of this document, some slight differences between IS-649 and this standard still exist. Also, there is no single industry standard for configuration management terms. Documents such as EGSA107G, IEEE1042, ISO 10007 and STANAG 4159 contain slightly different definitions for terms defined in this standard. Commonly Used Words - Two of your four suggestions to delete common terms were accepted and the terms, survivability, and evaluation were deleted. Contractual acceptance was retained and changed to read "Contractual Acceptance of Data. The action taken by the tasking activity signifying that an item submitted or delivered by the performing activity complies with the requirements of the contract." Terms not used - Your proposal to delete definitions for terms no longer used was adopted, however, in the three cases cited, a pointer to the new term remains to aid users in the conversion to the new standard. Delete terms defined by DEDs -Your recommendation to delete 10 definitions already defined in the DEDs was partially accepted. Four of the terms , i.e., Serial Number, Nomenclature, Lot Number and Document Custodian were retained. The other 6 terms were deleted, i.e., CAGE Code, Manufacturer"s Code, engineering change priorities, engineering change proposal type, NATO supply code,and classification of defects.

ATTN: AMSTA-AR-EDE-S, Bldg 12 (Lee Sadauskas)  
Picatinny Arsenal, NJ 07806-5000

TELEPHONE NO:              DSN: 880-6626

PAGE NO: C-022        PARAGRAPH NO: C.5        FIGURE NO:        TABLE NO:

PROPOSED CHANGE: (Exact wording of proposed change must be included)

DED - parts-list-drawing-document-identifier Last sentence reads: "...; no special characters allowed. Change to read: " "...and dashes only; no other special characters allowed.

JUSTIFICATION: (Required for essential comments)

DED - parts-list-drawing-document-identifier is used in Table 071 which is correlation of index list drawing revisions to their component parts list drawing. DED - primary-index-list-document-identifier, page C-22, last line states that dash numbers can be used in the identifier. It stands to reason that if the primary (or parent ) list can contain a dash in its identifier, the part list associated with it may have a dash number also.
